

RIH Foundation
COMMUNITY CONNECTION
A Year in Review

ROYAL INLAND HOSPITAL
FOUNDATION

A Message From RIH Foundation Chair, Alan Gozda

It has been an action packed year at the Foundation with new staff members, new events and new supporters. Heidi and her team worked hard to find new ways to raise even more funds for our hospital. They reenergized the Foundation Gala, renaming it The Royal Affair. The event raised \$175,000 in the first two years alone! The most encouraging part was that our donors generously donated over 2.3 million dollars in support of improving healthcare at RIH—the highest amount in over 5 years!

Bringing our community and healthcare team together has been instrumental to the success over the last year. Whether through MiniMED educational seminars, donor receptions, or community events, doctors are helping to engage the community in our hospital. Over forty doctors attended the Royal Affair this year where they were able to see Kamloopsians show their support for our hospital and medical staff.

As with any Board of Directors, change is inevitable; three board members will be moving on. Dr. Jim Bilbey, our longest serving board member, has served for seven years—the maximum time a director is allowed to serve. Dr. Bilbey brought his medical background to the Board and we thank him for all his years of support. Another long-standing board member, John Broadway, has decided to not only retire from the Foundation but also professionally

from his law practice. John has given us great support over the years and we wish him the best as he moves on to the next stage of his life. And finally, Robyn Holling will be moving from the Foundation Board to the Society, but we hope to get her back on the Board soon.

Well there you have it Kamloops, a year of change and accomplishment. Thank you to Heidi and her team for their hard work and dedication. Thank you to everyone in the community who supports our efforts to provide patients with excellent care at RIH. And a special thank you to the RIH Foundation Directors, a dedicated group of individuals who volunteer their time on behalf of all of us. I am truly blessed to have such a strong team.

Looking forward to another successful year ahead.

All the best,
Alan

Did you know...

RIH serves the largest geographical area in the Interior Health region and services a population of approximately 220,000. It regularly cares for patients from communities as far away as Lillooet, 100 Mile House and Williams Lake.

A Message from RIH Foundation CEO, Heidi Coleman

Welcome to the Royal Inland Hospital Foundation’s new publication, Community Connection, previously titled the Annual Report. We decided it was time to revise the report to better reflect our commitment to keeping you—our donors and community members— informed with current information on what’s new in the hospital and how the generosity of our community is changing the lives of our patients for the better.

This last year has been very exciting for us as we continue to engage with and connect our donors to our healthcare team and areas of the hospital that matter most to them. Through these connections, we are building a strong foundation of support which results in more up to date equipment and patient care excellence.

This upcoming year, we’re looking forward to working with our community to make more vital improvements to our hospital. Our fundraising efforts will be particularly focused on our \$2.5 million campaign to equip a new Operating Room at RIH. Our Pediatrics department will continue to benefit from ongoing community support and there is always a need for updated equipment throughout the hospital—this is how we can attract and retain top medical talent to our hospital. Additionally, I am thrilled that we are launching a new event this October, Dancing Like the Stars, to fundraise for Women’s Breast Health at RIH.

Royal Inland Hospital is essential to our community. I hope you enjoy reading more about the connections we are making in support of our hospital.

With gratitude,
Heidi

Donor Story: Variety - A Children's Charity

Variety Gives RIH's Smallest Patients the Best Start at Life

We were thrilled when we received news that **Variety - The Children's Charity** would be giving the Neonatal Intensive Care Unit (NICU) and Labour and Delivery departments a grant for \$279,027.

As a Level 2B nursery, premature infants as young as 30 weeks gestation are offered specialized care by RIH's highly skilled team of medical professionals right here in Kamloops. Last year, over 230 babies were admitted and treated in the NICU, and many more required short term observation in the NICU before joining their mother in the Maternity Department.

Variety has a long and rich history of helping families, communities and organizations throughout BC. Their mission is to inspire hope, enrich lives, and build a better future for children who have special needs.

"Nurses in the NICU are fantastic and we could not have imagined this experience without them."

~ Genevieve & Craig – Proud Parents

Because of Variety's generosity, the more than 1,200 infants born at RIH every year—and those who are admitted to the NICU—will have access to the most advanced and specialized care available.

Over the years, **Variety** has given the RIH Foundation more than \$1.1 million. This has made an incredible impact to the young patients and medical professionals at RIH. We are so grateful for their continued support of our hospital.

Donor Story: Ken Lepin

Ken Lepin Gives Lab Latest Tools of the Trade

Last winter, the Pathology Department was thrilled to learn that they would receive not one, but two critical pieces of equipment which had been on their wish list for some time—a testing instrument for *C. difficile** (and other pathogens) and a staining instrument used for detecting cancer.

"[The lab and its staff are] a hidden but critical link in the chain of patient care and recovery." ~ Ken Lepin

Ken Lepin has been an avid supporter of the Foundation for more than 25 years and after touring the lab and speaking with pathologists Dr. Steel and Dr. James, he was inspired to give \$152,000—enough to purchase these pieces of equipment that, as he would say, give the staff the best tools to get the job done efficiently.

Ken saw firsthand the amazing work that takes place in the lab each day, and the challenges that come with working with older equipment. He described the lab and its staff as "a hidden but untold critical link in the chain of patient care and recovery" and knew that purchasing these pieces of equipment would make a huge difference not only in the lab, but in the lives of patients.

With these new instruments, the turn around time for results is optimized. In the case of *C. difficile*, early detection helps to minimize the exposure of patients and healthcare workers to the bacterium. With both *C. difficile* and cancer, early detection greatly increases the chances for successful treatment.

To date, Mr. Lepin has given over \$450,000 to the Royal Inland Hospital Foundation. We want to thank him for his generosity over the past 25 years and for the impact he is making on patient care at RIH.

Dr. Gerry James, Department Head of Pathology, explains: "The new immunostainer is clearly superior to our older stainer. It is very reliable and this results in a consistent and faster turnaround time, especially in critical cases requiring a rapid and accurate answer for our patients".

Ken Lepin with Dr. Lisa Steele, Pathologist

* *Clostridium difficile*, commonly called *C. difficile*, is a bacterium that causes serious intestinal conditions. The reported incidence of healthcare-associated *C. difficile* infection in North America has risen over the last decade. It is associated with increased morbidity and mortality.

A Royal Affair

In 2011, the RIH Foundation started a gala dinner as part of our fundraising campaign. Last year, however, we asked ourselves, "What can we do differently?" We decided to move away from the traditional gala format to create a new experience—unlike anything Kamloops had ever seen—which we called the "Royal Affair". Mystery and intrigue was our approach—the secret location was only revealed to guests on the morning of the event. The most frequent question we received was, "What should I wear?!" Our evening was a resounding success, and had the whole city buzzing! It became Kamloops' best kept secret.

Photo credit: Aspect Arts Photography

The mystery continued with our second Royal Affair this past June. We were overwhelmed with the support of the community, and tickets sold out simply from the support of the previous year's attendees and through word of mouth. Once again, guests were told to call in the day of the event for the revealing of the mystery location, the former Rona building. After entering into this once-empty space through a tunnel of lights and circus-themed music, guests stepped into a room transformed into a "sexy circus" experience. Dazzling lights and flowing fabric adorned the room. Live artists were abundant, creating a variety of masterpieces for the highest bidders. Acrobats and fire dancers were just

some of the outstanding performers throughout the evening. Ten Souljers band gave a performance that kept the dance floor packed.

The Royal Affair raised a tremendous \$100,000 which will go towards equipping the new Operating Room. We are most grateful to the support of our community and to the dedicated committee members who put in countless hours to ensure the evening would be a one-of-a-kind experience for our guests. What will next year bring...?

South Central Trucking and Industry Charity Golf Tournament

This May marked the 17th Annual SCT&I Charity Golf Tournament and proved once again to be another success with an astounding \$90,000 raised to help equip the new Operating Room at RIH. This tournament always guarantees a full day of fun and excitement, all while supporting a great cause. The RIH Foundation is very grateful to the Tournament's Steering Committee for their outstanding dedication and support. Committee members included: Brent Ashby, Stella Black, Dominic Carbonette, Ron Marshall, Eric Davis, Tom McGowan, Pat Nichol, Kevin Phillips, Ron Popove, Byron Sample, Bob Selman, High Sutherland, and Spencer Woodland. We look forward to more remarkable tournaments in the years to come.

Teck Highland Valley Copper

Since 1988, Teck Highland Valley Copper Mine has been supporting patient care at RIH through a variety of fundraising activities and events including their Mining for Miracles campaign, the Highland Valley Open House and both a summer and winter fishing derby. Now in its 9th year, the annual Trojan Pond Ice Fishing Tournament is a fun-filled day where people of all ages can enjoy fun winter activities

Photo credit: Gary Winslow

including bob sledding, ice bowling and ice fishing. In 2013 alone, over \$54,000 was raised by Highland Valley staff, families and supporters to help ensure healthcare excellence at RIH.

McHappy Day

For one sunny and exciting day in May, McDonald's restaurants in Kamloops and Merritt donated \$1 from every McCafé® beverage, Happy Meal® or Big Mac® to RIH Foundation. With the help of the community, who indulged in some tasty treats, over \$76,000 was raised in support of Pediatrics care at RIH. With McDonald's support, a new Panda infant warmer

will be used in the Operating Room where caesarian births take place to help keep our youngest patients warm and safe. Now that's something to be McHappy about!

Pink Ribbon Ball

The Pink Ribbon Ball came to an end after 16 successful years of raising awareness and funds in support of women's breast health. At just 19 years old, Anthony Salituro was inspired to start this event with the help of his aunt, Josephine Bruno, after watching her survive her own struggle with breast cancer. In honour of the community's support over the years, Anthony and Josephine decided to direct the funds raised to RIH; \$125,000 was given in support of breast health initiatives in Kamloops.

On behalf of the entire RIH healthcare team, our patients and their families, thank you to Anthony and Josephine for their incredible dedication and commitment to women's health.

A New Operating Room for Royal Inland Hospital!

RIH Foundation is currently raising funds in support of surgical equipment to outfit a new Operating Room at RIH. This \$2.5 million campaign will ensure our hospital can keep up with the growing surgical demands of our community. It will be dedicated to the patients who've been waiting the longest.

The list of equipment needed to create an entirely new OR is long and includes technology, tools and instruments both big and small. Some of the items we are seeking community support for include:

Specialized Surgical Instruments	\$250,000
Anaesthetic Machine and Monitors	\$160,000
Operating Table	\$70,000
Ultrasound machine	\$70,000
Portable Glidescope	\$30,000

The anaesthetic machine and monitors are vital to every operating room to ensure the surgical patients are carefully and properly sedated throughout their surgical procedure.

A state-of-the-art operating table allows the surgical team to easily move patients into specific positions needed for different types of surgery.

A glidescope is used to provide a consistently clear, real-time view of the patient's airway and tube placement, enabling quick and precise intubation.

What our patients are saying:

"I've been a patient at Royal Inland Hospital for many years covering many life-threatening operations and procedures for Chronic Fistulizing Crohn's Disease.

I know how intimidating and stressful an operating room can truly be and the importance of having patients think positively and feel hope. I can tell you that the staff in RIH's operating and recovery rooms are some of the best. They are fun-loving and humorous while still being professional. They are compassionate as well as thorough and efficient. I would not be here if it wasn't for them.

This is why I have been so motivated over the last few years to show my appreciation back through Mastermind Studios in support of the Royal Inland Hospital Foundation and their efforts to make our hospital a better place for patients and staff. **A healthier hospital equals a healthier community.**"

~ Peter Cameron-Inglis, OR Patient

What our surgeons are saying:

"I have trained and worked at over a dozen hospitals, and visited multiple hospitals throughout the world. I am constantly amazed at the breadth and depth of the surgical program at RIH. The surgeons and entire hospital staff do an amazing job, especially considering the resources available."

~ Dr. Omahen, Neurosurgeon, Chief of Surgery

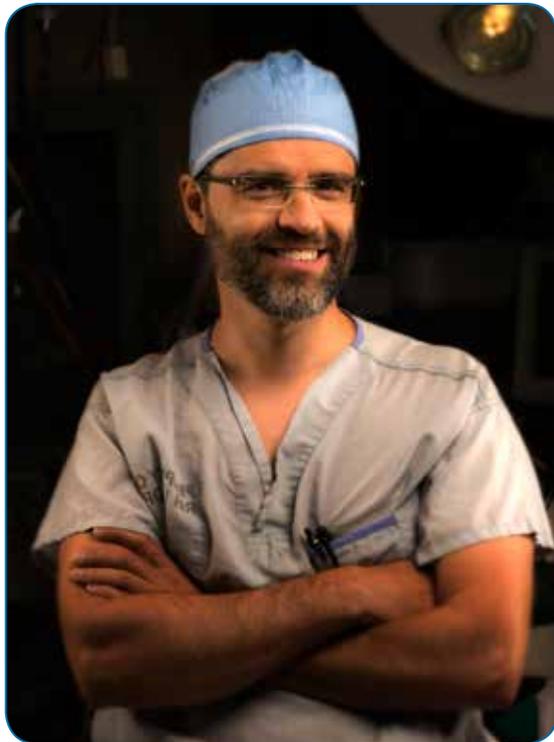

Photo credit: Outerbridge Photography

A Day in the Life

On a typical day in the OR, surgeries are being performed from first thing in the morning often until well into the evening. Along with scheduled surgeries, there is always an additional list of patients that require emergency surgery that cannot wait. Our expert surgical team work long hours together to ensure their patients receive the best care and outcome possible.

Mike's Story

As an avid mountain biker, recent TRU graduate Mike Reid, was training for the Canadian Nationals Mountain Biking Race at Sun Peaks when he took a hard fall while jumping off his bike in order to avoid crashing into a tree. He was brought to the ER at RIH for x-rays and it was discovered that he had broken both his right wrist and the fibula bone in his left leg. Surgery was necessary to repair the damage and within 48 hours he was in the OR with orthopedic surgeon Dr. William Beaton. Mike is grateful for the care he received: "Kamloops is an active community and accidents like this are sadly, very common. I know that because of the orthopedic care and surgery I received, I will be back to doing what I love very soon."

Photo credit: Jeff Faulds

Did you know...

Royal Inland Hospital has the 3rd largest trauma unit in BC. In the last year, over 10,000 surgeries were performed at RIH and of those, over 30% were emergencies.

Donor Story: Guy Mercier

Guy Mercier Comes in with a BOOM

Last fall, we told our supporters the story of a young woman, Jenelle, who had been terribly wounded in a plane crash near Brenda Mines off the Coquihalla Connector Highway. Jenelle attributes her survival to the rescue team who found her after she lay unconscious for two hours and to the outstanding trauma team at RIH who worked quickly to stabilize her.

Jenelle is doing well and her priorities these days are to live simply and make sure the time she spends with friends and family is quality time. She is grateful for each and every day, and for the care she received at RIH.

We had an overwhelming response to her story—raising \$100,000—and were on our way to raising the funds needed to renovate the Emergency Room Trauma Room with Overhead Articulating Booms. As the demands to the ER continued to increase—last year more than 57,000 patients were admitted to the department—we were eager to update the space and install the booms. Then in March, community leader Guy Mercier stepped up to the plate and pledged the remaining \$130,000 which was needed to move ahead with this project.

“Experiencing [the ER] firsthand was inspiring and motivated me to give back to RIH.” ~ Guy Mercier

“One evening I ended up in the hospital and was astounded with the work of the Emergency Department. I recognized the ER was an integral component to the hospital, but experiencing it all firsthand was inspiring and motivated me to give back to RIH. I wanted a specific project that would make a difference; when I learned of the need for the booms in the ER, this was the project,” said Mr. Mercier.

Dr. Anders Ganstal, ER Medical Director, and Guy Mercier

Once installed, the booms will allow medical equipment to be mounted off the ground, diminishing the needs for cords to run across the ground, and be easily pushed out of the way allowing staff to move about quickly. It is crucial to make the space as functional as possible, so the trauma team can work together quickly and efficiently in high stress, often life and death, circumstances. The Trauma Team is grateful to the generosity of the community and to Guy Mercier for this remarkable gift.

RIH Trauma Department Receives Praise

Congratulations to the RIH staff who recently received recognition by the Interdisciplinary Trauma Network of Canada for their exceptional care of patients with multiple rib fractures, resulting in shorter hospital stays and improved outcomes of these trauma patients.

Afternoon and Evening Auxiliaries

RIH Auxiliaries: A Lasting Impact

Both the Afternoon and Evening Auxiliaries to RIH have a long legacy of supporting healthcare in our community. The past year was no exception with the Auxiliaries funding a variety of equipment that will have an immediate and long-lasting impact on patient care.

The **Afternoon Auxiliary** is helping the Diagnostic Imaging team at RIH detect and diagnose osteoporosis quickly and accurately through their investment in a new Bone Density System. This new machine replaced one that was over a decade old with more limited imaging capabilities.

Osteoporosis is a growing healthcare crisis affecting millions of people worldwide and can be life-threatening. If not diagnosed or treated, osteoporosis can progress until a bone fractures or breaks. The new bone density machine has advanced software which results in very high resolution images and, therefore, a more accurate osteoporosis diagnosis than previously possible.

To learn more about the Afternoon Auxiliary, visit: www.rihauxiliary.com

Early detection is also imperative to cancer patient outcomes and with the **Evening Auxiliaries'** support, a new colonoscope is helping physicians at RIH screen more patients for colorectal cancer.

Dr. Taralyn Picton, a gastroenterologist at RIH, is thrilled with the Evening Auxiliary-funded scope for several reasons: "The new scope is smaller and flexible enough that it can be used for our most difficult cases. As well, the state-of-the-art scope has better optics than prior models which ensures we offer quality service to our patients."

Physicians can take samples with the scope and mark exact areas of cancer which can ultimately lead to less invasive surgery for the patient. The colonoscope is also used for patients suffering from conditions such as Crohn's Disease and Colitis.

The RIH healthcare team, patients and their families all benefit from the exceptional support of the RIH Afternoon and Evening Auxiliaries—thank you!

Evening Auxiliary presents cheque at Pledge Day.

Did you know...

As a UBC teaching hospital, RIH is responsible for training 3rd year medical students and family practice residents.

Did you know...

RIH is a full-service tertiary care hospital, with medical professionals specializing in the following areas: cancer care, cardiology, medical imaging, neurology, nephrology, obstetrics, pathology, pediatrics, psychiatry, rehabilitation services, respiratory therapy and surgery.

Legacy Fund

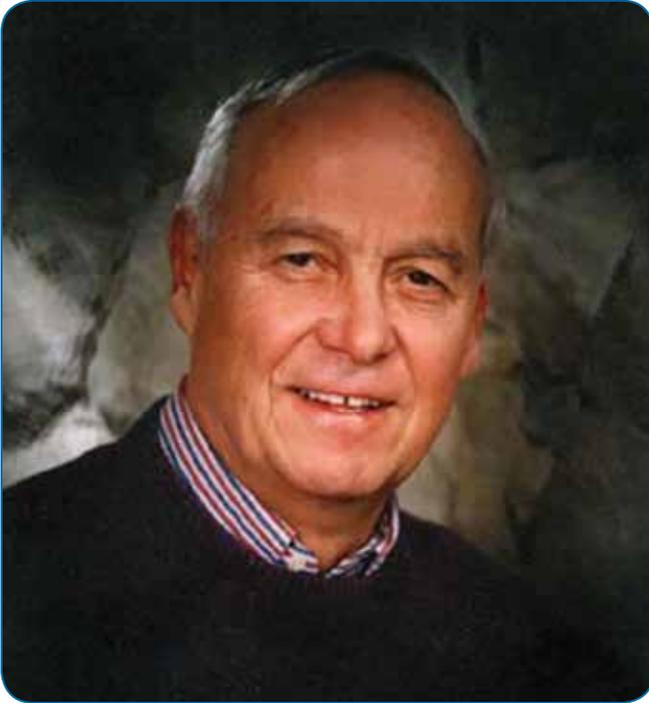

RIH FOUNDATION

LEGACY FUND

Live. Love. Give.

A legacy gift to Royal Inland Hospital Foundation can have a tremendous impact on patient care at RIH for generations to come. Including us in your Will, a gift of securities or a life insurance policy are all great ways to demonstrate your commitment to healthcare excellence at RIH. Please contact us to find out more about creating your legacy.

Remembering Dr. Lloyd Nixon April 23, 1931 – February 24, 2014

Dr. Lloyd Nixon came to Kamloops in 1966 after graduating from the University of Alberta and a full family practice in Rosland, B.C. He established a very busy practice with Dr. H. Unruh and later with Dr. Robert Love, who was a very close confidant and friend.

Lloyd served on many committees in the Medical Community and at Royal Inland Hospital always advocating changes for his patients until 1989 when he retired. He served on the RIH Foundation's Board of Directors in 1987.

Dr. Nixon exemplified living life to the fullest through hard work, skiing, sailing, bicycling, golfing and travelling around the world and he enjoyed sharing these activities with family, friends and loved ones at his summer cottage at Shuswap Lake or at Tod Mountain (Sun Peaks). He was a great teacher and mentor for all. He was an avid skier and pioneer of hell-skiing which he continued to enjoy until 2013.

He will be lovingly remembered by his wife of 42 years, Rae, and their family. For many years, Lloyd and Rae have been generous supporters of the Royal Inland Hospital Foundation and years ago, chose to include our hospital in their estate planning. Their contribution is truly remarkable and the Foundation is grateful to be part of their shared legacy.

RIH Foundation received gifts from the estates of the following individuals during the 2013-14 fiscal year:

Arnold Poelzer
Ellen Jean Schubert
Emile Joseph Vandean

Diagnostic Imaging

In 2013, the **Iccha/Wish Fund** was responsible for the purchase of a portable X-ray machine which allows healthcare staff to x-ray patients in their bed rather than transporting them to Diagnostic Imaging. It's used for critically-ill patients, trauma cases and in the operating room when an image is needed on the spot.

Emergency Room

The **Mr. and Mrs. P.A. Woodward's Foundation** generously funded two new LifePak 20e cardiac monitor and defibrillators for the Emergency Room. Any patient that comes to RIH suffering from dizziness, weakness, chest pain, decreased consciousness, arrhythmia or cardiac arrest is monitored with a LifePak and can be treated with the defibrillator.
